

## **Obtaining EVA Vibration Analysis Tools Software for Schindler Computers**

In order to install the EVA/MMC software for either Elevator Ride Quality or Escalator Step/Skirt Performance Testing, a special installation package for the EVA875 Version 8.75.1100 must be requested from Schindler IT, PC Support. Schindler has developed this package to run in their security environment.

If you are using a non-Schindler field laptop, software can be obtained by contacting PMT.
